VELOREX

Velorex: Jedinečné tříkolové vozítko s plátěnou karoserií

Velorex je jediné homologované vozidlo s plátěnou karoserií na světě, vytvořené bratry Františkem (1914–1954) a Mojmírem (1924–2011) Stránskými po druhé světové válce. Původně nazývaný OS-KAR ("kára na ose"), byl navržen jako cenově dostupný dopravní prostředek. Po znárodnění v roce 1948 se výroba přesunula do Solnice a vozidlo bylo přejmenováno na Velorex.

Vyrobeno bylo přibližně 15 300 tříkolových a 1 380 čtyřkolových modelů s motory o objemu 175 cm³ a 350 cm³, známých jako Velorex 16/175 a Velorex 16/350. Díky své jednoduchosti a dostupnosti si Velorex získal popularitu nejen v Československu, ale i po celém světě. Dnes je ceněn sběrateli a lze jej nalézt v Evropě, Asii, Americe a dokonce i v Austrálii.

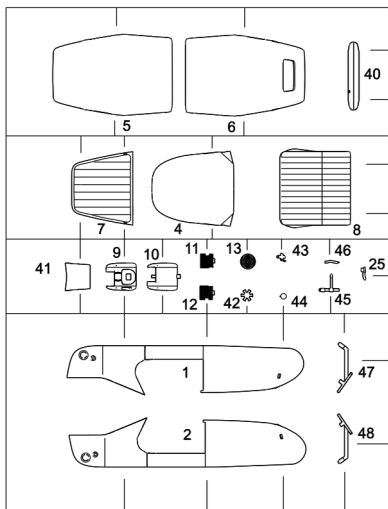

Velorex: The Iconic Three-Wheeled Vehicle with a Canvas Body

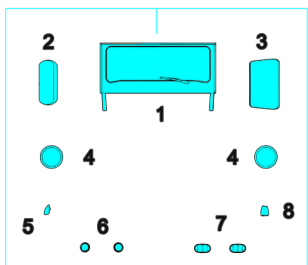

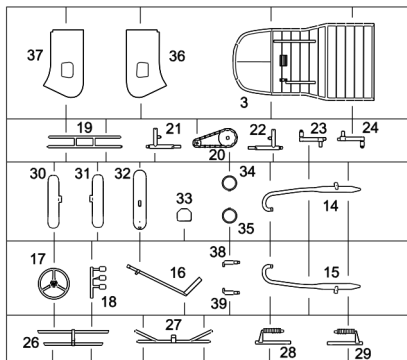

The Velorex is the world's only homologated vehicle with a canvas body, created by brothers František (1914–1954) and Mojmír (1924–2011) Stránský after World War II. Originally called OS-KAR ("cart on an axle"), it was designed as an affordable means of transportation. Following nationalization in 1948, production moved to Solnice, and the vehicle was renamed Velorex.

Approximately 15,300 three-wheeled and 1,380 four-wheeled models were produced, featuring 175 cc and 350 cc engines, known as Velorex 16/175 and Velorex 16/350. Due to its simplicity and affordability, the Velorex gained popularity not only in Czechoslovakia but worldwide. Today, it is valued by collectors and can be found in Europe, Asia, America, and even Australia.
